**Job Title**

Project Expert -Animal Production, Natural Resources Management and Resilience

**Organization**

The African Union Interafrican Bureau for Animal Resources (AU-IBAR) is a specialized Technical Office (STO) of the Department of Rural Economy and Agriculture (DREA) of the African Union Commission (AUC). Its mandate is to support and coordinate the sustainable development and utilization of animal resources (livestock, fisheries and wildlife) to enhance nutrition and food security and contribute to the wellbeing and prosperity of the people in the MSs of the AU. AU-IBAR accomplishes its mandate through supporting and empowering the African Union member states and the Regional Economic Communities (RECs). AU-IBAR's vision is of an Africa in which animal resources contribute significantly to the reduction of poverty and hunger. Founded in 1951 to study the epidemiological situation and fight rinderpest in Africa, AU-IBAR's mandate covers all aspects of animal resources, including livestock, fisheries and wildlife, across the entire African continent, but fills a unique and strategic niche by working at continental and regional levels, with the RECs being key partners.

Recently, AU-IBAR led a cross section of stakeholders in the livestock sector on the African continent to formulate the Livestock Development Strategy for Africa (LiDeSA), a 20-year framework for the collective and coordinated development of the livestock on the continent. The strategy was approved by the AU Heads of States and Governments of the AU in January 2015.

To initiate the implementation of the LiDeSA, the European Union has made available funds to assist AU-IBAR implement the Sustainable Development of Livestock for Livelihoods in Africa (Live2Africa) project, which will initiate the implementation of the LiDeSA.

AU-IBAR intends to apply part of the funds for employing experts in various disciplines to spearhead the implementation of the Live2Africa. In this regard, AU-IBAR seeks the services of a Project Expert -Animal Production and Resilience, who will be responsible for implementing the Animal Production, Productivity and Ecosystem Management component of the project.

## **Department**

Post:

Post title: Project Expert -Animal Production, Natural Resources Management and Resilience

Post level: P3 Step 5

Duty station: AU-IBAR, Nairobi, Kenya

Number of Positions: 1

## **Project**

Job Purpose:

Under the management supervision of the project officer and the overall supervision of the project coordinator, the Animal Production, Natural Resources Management and Resilience Expert as a member or leader of multidisciplinary teams will contribute to the implementation of operations/activities relating to Live2Africa component on animal production, productivity, ecosystem management and Resilience of Livestock Production Systems.

## **Tasks**

Major Duties and Responsibilities:

- Advise and provide technical support in formulation and implementation of policy frameworks in areas of sustainable natural resources management, animal feed, animal genetic resources, and climate change and resilience.
- Advise on information and data to be collected, collated and disseminated on all aspects of animal production to improve the productivity of animal resources in Africa;
- Assist in Compilation and analysis/synthesis of data/information on livestock's contribution to climate change, as well as its impact on animal production, to inform policy making and public education;
- Advise on identification and facilitation of avenues for exploitation of opportunities for African livestock keepers to benefit from payments for ecological services (ecotourism, rehabilitation of degraded lands, controlled grazing, biodiversity and landscape conservation etc.);
- Assist in the Development of, and/or making available, best practices and policy guidelines to build, capacities of RECs and member states to manage the conflicts arising from access and utilization of natural resources on which livestock depend;
- Assist in the Development of a continental strategy and implementation framework for the conservation of Africa's livestock genetic resources;

## **Requirements**
