Job Title

ELECTRO-MECHANICAL ENGINEER

Organization

The African Union, established as a unique Pan African continental body, is charged with spearheading Africa's rapid integration and sustainable development by promoting unity, solidarity, cohesion and cooperation among the peoples of Africa and African States as well as developing a new partnership worldwide. Its Headquarters is located in Addis Ababa, capital city of Ethiopia.

In seeking to achieve these objectives, the African Union intends to strengthen its capacity to deliver by, among others, the implementation of new organization structure and the filling of regular and short-term vacant posts.

Department

Post / Job title: Electro-mechanical Engineer

Grade: P2

Report to: Chief of Facilities Maintenance Unit

Division: Administration and Facilities Management Division

Directorate: Administration and Human Resources Management Division.

Duty Station: Addis Ababa, Ethiopia

Number of Positions: 1

Project

To perform the duties of Electro-mechanical Engineer in management, maintenance and sustainability of all electrical and electro-mechanical facilities of the African Union as well as assist in the general maintenance Plant, Property and Equipment as well as those covered by service level agreements with external service providers. The incumbent shall contribute in formulation of strategic objectives by ensuring a complementary strategic development of the Maintenance policies, Standard Operating Procedures of Maintenance and compliance with organizational requirements. He/she shall operate under the direct supervision of the Chief of

Facilities Maintenance Unit in the Administration and Facility Management Division within the Directorate of Administration and Human Resources Management.

Tasks

The incumbent shall:

- Be in charge of all high and voltage, solar, Uninterruptible Power Supply (EPS), Emergency Power Supply (EPS), Escalators and Generators.
- Ensure the power supply from the local Power Authority, communicates as required with the local Electric Power Corporation and maintains good working relationship, reviews electrical bills for the assertion of bills presented in line with the standardized power supply rates.
- Be in charge of the operation, maintenance and management of all electrical and electromechanical facilities
- Be in charge of all management, upkeep, in house or outsourced inspection, operation & maintenance of all electrical and electromechanical systems of:
 - Power supply systems, generators, EPS, UPS, Elevators and Escalators,
 - Electrical/Electromechanical systems of the HVAC systems, firefighting systems, security and safety systems, gates (bollards, barriers and sliding gates), lighting system, décor lighting systems
 - Electrical/Electromechanical equipment and tools such as medical equipment, kitchen equipment, ladders, window cleaning machines, cranes (spider crane), flagpoles and others.
- Plan, execute, follow-up and keep records on the inspection, operation and maintenance of all electromechanical systems and equipment and highlights lessons learned;
- Advise on design, installation and maintain cost-effective and energy efficient systems for building services such as water, lighting, heating, air conditioning, elevators, escalators and telecommunications equipment.
- Timely handle supplies (parts, generator fuel, hydraulic oil, and others) management for the electromechanical equipment from inception, purchase request generation, follow-up and approval up to delivery.
- Prepare conceptual designs and modifications of existing and occasionally new electrical and electromechanical installations utilizing relevant software like Auto CAD, MS office, Excel. Access and Visio and assist in preparation of related technical specifications and bill of quantities.
- Follow-up on the execution of all electrical/electro-mechanical work for new construction, upgrading, conversions/renovation undertaken by the division.
- Draft specifications, drawings, and bills of quantities for new or improvement works in electromechanical areas.
- Carry out survey on electrical and electromechanical installation and prepare recommendations for improvement or replacement.
- Regularly inspect and analyze power supply and distribution systems, electromechanical equipment performance, identify faults and continuously work on power saving cost reduction methods.
- Supervise and coordinates all daily or periodic maintenance activities as per the schedule and certify jobs done by internal maintenance crew as well as staff of external maintenance service providers.
- Generate annual / biannual budget requests and prepares departmental reports, drafts memos, letters and other communications.
- Keep in organized and standardized manner all documents manuals, installation drawings, fees, bills, contracts, standards, rules & regulations, data and others and present them whenever necessary.
- Performs additional duties or responsibilities, consistent with the role and grade, as may be assigned by supervisors.
